SOFTWARE ENGINEER | FRONT-END DEVELOPER | DESIGNER

Software Engineer and UI/UX/Graphic Designer with skills in building applications with a user-experience approach by utilizing React, JavaScript, CSS, Rails, and RESTful API architecture with expertise in design/production of Front-End Web Development. Passionate about continuous growth and skill expansion, looking forward to joining an organization with a culture that values the growth mindset. I provide creative detail to Front-End Development, and thrive in fast-paced environments.

TECHNICAL SKILLS

JavaScript, React, Ruby, Rails, SQL, HTML, CSS, Rest API, Postman, Firebase, Bootstrap, Framer Motion, Styled Components, Adobe Photoshop, Adobe Illustrator, Figma

TECHNICAL PROJECTS

Film List - [Live](#) | [GitHub](#) - email: test@test.com - password: 123456

Film watch list application for adding your favorite films and or suggestions to your list.

- Full CRUD application with User Authorization Utilizing React with Firebase fetching data dynamically
- Created UI with React, CSS, Figma, Framer-Motion (Animation)
- Implemented custom React hooks/context for storing & fetching data in Firebase and switching between themes and color modes

Layr Sequencer - [Live](#) | [GitHub](#) - username: test - password: 12345678

Interactive music application featuring a 16-Step Sequencer for creating melodies/patterns and a 24-key piano with drum pad mapped to individual keys on the keyboard.

- Designed interactive UI with React, Bootstrap, HTML, CSS, Figma
- Utilized Ruby, PostgreSQL, Active Record, and Bcrypt hashing algorithm to manage encrypted user information

Simple Fridge - [GitHub](#)

Group project that keeps track of the grocery items in your fridge and shows how many days until the items expire. The user has the ability to add new items and remove current items from their fridge.

- Developed with a React front end and managed data using Ruby/Sinatra back end
- Created UI elements using React, Bootstrap, HTML, and CSS - Utilized Git for version control
