Software Engineer and UI/UX/Graphic Designer with skills in building applications with a User-Experience approach, by utilizing React, JavaScript, CSS, Rails, and RESTful API architecture with expertise in design/production of Front-End Web Development. Able to quickly grasp new concepts, passionate about continuous growth and skill expansion, looking forward to joining an organization with a culture that values the growth mindset.

## TECHNICAL PROJECTS

**Film List** [Live Github](#) | email: test@test.com - pass: 123456

*Film watch list application for adding your favorite films and or suggestions to your list.*

- Full CRUD application with User Authorization Utilizing React with Firebase fetching data dynamically
- Created UI with React, CSS, Figma, Framer-Motion (Animation)
- Implemented custom React hooks/context for storing & fetching data in Firebase and switching between themes and color modes

**Layr Sequencer** [Live Github](#) | user: test - pass: 12345678

*Interactive music application featuring a 16-Step Sequencer for creating melodies/patterns and a 24-key piano with drum pad mapped to individual keys on the keyboard.*

- Designed interactive UI with React, Bootstrap, HTML, CSS, Figma
- Utilized Ruby, PostgreSQL, Active Record, and Bcrypt hashing algorithm to manage encrypted user information

**Simple Fridge** [Github](#)

*Group project that keeps track of the grocery items in your fridge and shows how many days until the items expire. The user has the ability to add new items and remove current items from their fridge.*

- Developed with a React front end and managed data using Ruby/Sinatra back end
- Created UI elements using React, Bootstrap, HTML, and CSS - Utilized Git for version control

## EXPERIENCE

**Freelance - UI/UX/Graphic Designer**

**2019-PRESENT**

- Logo, Branding, Flyers, Menus, Merch, Web Design, Wire framing, Prototyping

**Industry Print Solutions - Director Of Operations**

**2017-2021**

- Proofing/Editing designs and color matching before production
- Shopify store management - uploading products and managing data
- Implementing various printing methods and operating numerous digital printing machines
- Implemented new shipping system and increased fulfillment by optimizing inventory management system
